What makes our Outdoor- / All-weather Blinds stand out from the rest?

FEATURE	BENEFIT
1. Rope and pulley system	1. a. Cost effective - Crank handle system is a lot more costly b. Mechanism flush against walls / pillars - Crank handle either gets in the way or have to be stored c. Sealed of air- and water properly on sides and top – with crank handle system installers use Velcro or clips to try and seal the sides of the blinds.
2. 550micron PVC / Ripstop 400	2. a. Extremely durable b. Does not tear easily / at all. c. PVC does not absorb water, which leads to material's integrity being compromised in the long run.
3. Use of pulleys instead of hooks for draw strings.	3. Less chance of draw strings fraying.
4. "Loose fit" (our blinds will never be fitted <u>too</u> tightly)	4. a. The materials are not under constant strain, which inevitably leads to tearing of seams or material. b. It allows for natural shrinkage or expansion of other materials, e.g. the PVC windows.
5. Weather flap of 15cm	5. Keeps out ±90% of direct water exposure / rainfall.
6. 32mm Galvanised pipe in bottom seam	6. a. Eliminates rust stains forming on material around bottom rail. b. The weight lends further stability against wind.
7. ±10mm gap between bottom rail and ground	7. Draw strings / blind won't fray from scraping on the ground.
8. Industrial strength zips	8. As the zips essentially keep the blinds secured against strong winds, we have selected the best possible zips for this application to ensure many years of hassle-free use.
9. 4mm nylon draw strings	9. Strong and durable and its integrity does not get compromised when exposed to water.
10. Optional curtains	10a. Secured with top quality Velcro b. No hems which leads to rolling up unevenly or bulging. c. Light weight and can be rolled up for easy storage.
11. Powder-coated colour matching of slide rails	11.a. Reduces risk of corrosion (especially when less than 500m from sea). b. Aesthetically pleasing.
12. Bottom cleats	12. Helps stabilize blinds against strong winds.

Bottom cleat

Side cleat

Pulley

Powder coating

All our blinds are guaranteed for 2 years under normal wear and tear conditions.
